

86T AWARD WINNING INKJET CARTRIDGE SERIES FROM PRINT-RITE

About 86T

Our proprietary 86T compatible inkjet cartridge recently has won the GOLD AWARD of SIPO (The State Intellectual Property Office of the People's Republic of China), the highest patent award in China, which is also recognized by World Intellectual Property Organization (WIPO).

The award is a confirmation of the revolutionary and outstanding design of 86T cartridge. It is not just a "foam-free" inkjet cartridge. The ink supply system, the chip and the ink formula are all the results of years of hard work by our R&D and production team. Patents have been granted or are under application in many countries.

86T compatible inkjet cartridges are now on direct sale on the Print-Rite.co.uk website.

We Benefit Customers with Technology Breakthrough

86T Compatible Inkjet Cartridge is based on a brand new foam free-ink design and proprietary ink formulas. Users enjoy larger ink volume and lower cost per page but equally brilliant printing quality.
